Free forever plan

Setup in under 2 minutes

OVERVIEW

One product. Every workflow.

MiniTask replaces scattered boards and spreadsheets with a single workspace — from first invite to shipping analytics, recurring ops, and mobile companion apps.

3x

Faster task completion

60%

Less status-meeting time

2 min

To first live board

01

Create your workspace

Sign up, invite your team, and set roles in under two minutes.

02

Organize projects

Spin up boards, columns, and sprints matched to how you deliver.

03

Collaborate & ship

Comments, mentions, automations, and analytics keep delivery moving.

03 Boards & views

Kanban, Scrum, table, filters

04 Tasks & subtasks

Priorities, labels, attachments

05 Recurring work

Series, health, overdue lanes

06 Collaboration

Mentions, notifications, activity

07 Analytics & automation

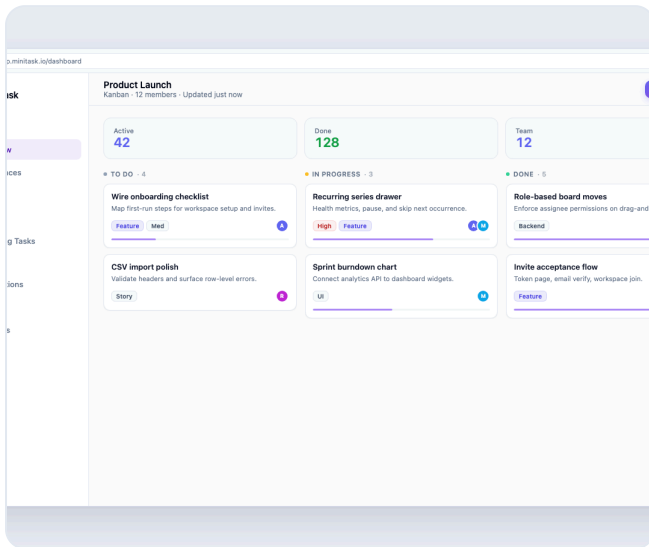

Insights, rules, time tracking

08 Workspace & security

RBAC, audit, billing, mobile

Boards & views

Drag-and-drop delivery surfaces that match how your team actually works — switch views without losing data.

Three views. One source of truth.

- **Kanban** — custom columns, WIP limits, quick-add
- **Scrum** — sprint swimlanes plus backlog
- **Table** — sort, filter, and bulk-edit at scale
- Switch Kanban ↔ Scrum ↔ Table without data loss
- Saved views to bookmark filter sets
- Board search, priority & assignee filters
- Sort by created, completed, priority, due, title
- Bulk selection and assignee actions

• Workflow control

Custom workflow statuses and columns
WIP limits per column
Board stats and WIP awareness
Role-based board permissions

• Scrum & sprints

Sprint entities with task assignment
Swimlanes by sprint + Backlog lane
Story points on tasks
Estimated minutes for planning

Tasks, subtasks & files

Rich work items with everything a delivery team needs — from priorities and labels to nested checklists and previews.

● Task fields

Title & rich-text description
 Priority: Critical / High / Medium / Low
 Due date and due time
 Multi-assignee support
 Color-coded labels & tags
 Story points & estimates
 Sprint association
 Parent / child task hierarchy

● Subtasks

Nested checklist with status
 TODO · In progress · Done
 Per-subtask assignees
 Per-subtask due date & priority
 Subtask detail panel
 Subtask file attachments
 On-site completion (mobile geofence)

● Attachments

Task & subtask uploads
 Image, PDF, Office preview
 Description image embeds
 Org storage quota enforcement
 CSV import into projects
 ZIP export / import with media

Built for day-to-day execution

- Task detail modal with full editing
- Quick-add tasks directly on the board
- Status moves via board drag or detail view
- Recurrence filter on boards

Data portability

- CSV import for bulk boarding
- ZIP export of tasks and media
- Workspace CSV export for backups
- Your data stays exportable on every plan

Recurring work engine

A dedicated system for work that never stops — daily ops, weekly rituals, and monthly checkpoints with health visibility.

Series planner

- Daily, weekly, monthly, and custom cadences
- Series library with drawers for management
- Duplicate, archive, or delete series
- Pause and resume entire series
- Recurring subtask checklists per occurrence
- Automatic occurrence generation

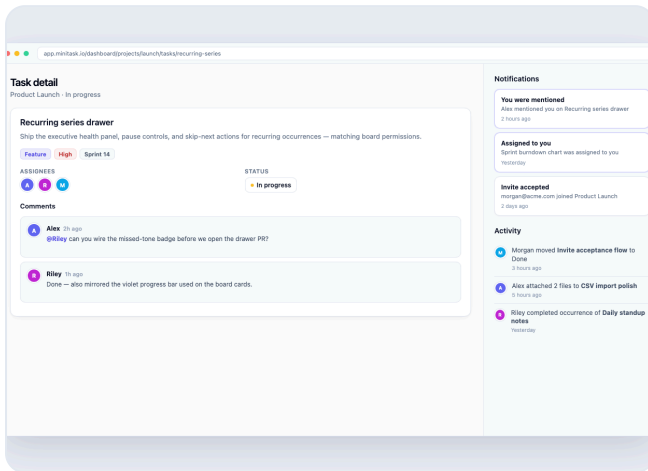

Execution & health

- Complete, skip, or snooze occurrences
- Calendar, agenda, and board views
- Dedicated overdue lane with missed tones
- Executive health panel (missed & at-risk)
- Permission-aware status moves
- Recurring summary KPIs

Collaboration & communication

Keep everyone aligned with comments, mentions, notifications, and a live activity stream — without another status sync.

Stay in the loop

- Threaded task comments
- @mentions in comment input
- In-app notifications inbox
- Mark read / read all
- Live activity feed
- Push notifications on mobile (FCM)

• Email & alerts

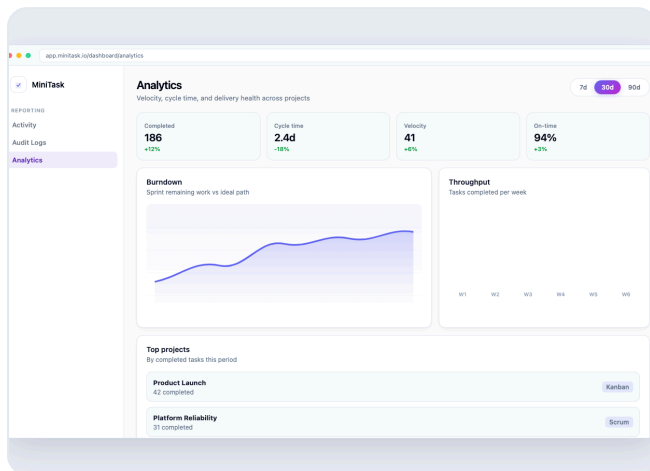

Assignment notifications
Invite emails
Subtask update alerts
Email verification & password reset
Email change request / verify

• Auth options

Email & password signup / login
Google OAuth (optional)
Phone OTP login
Invite-based signup links
Change password & secure logout

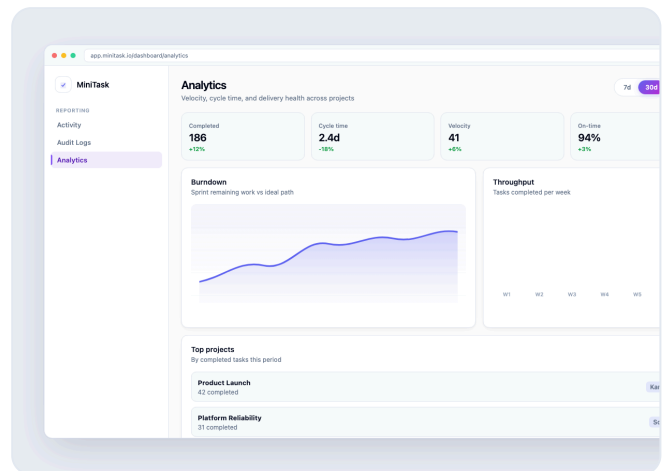

Analytics, time & automations

Leaders get delivery truth. Teams reduce manual overhead with rules that notify, update status, and log time as work moves.

Analytics & reporting

- Org analytics for admins & owners
- Member, project & task counts
- Active users & activation funnel
- Plan status and usage visibility
- Project overview dashboards
- Recurring health & summary KPIs
- Throughput and delivery trends

Automations & time

- Org-scoped automation rules
- Auto-notify stakeholders
- Auto-update statuses on moves
- Auto log time when tasks progress
- Manual time entries with notes
- Estimated vs logged minutes
- Custom fields module

Workspaces, security & mobile

Multi-tenant structure with enterprise-grade controls — plus a Flutter companion for iOS and Android.

• Workspaces & orgs

Multi-workspace accounts
Org switcher (sidebar + nav)
Workspace name, logo, font size
Member invite & ownership transfer
Roles: Owner / Admin / Member
Custom roles & permission matrix
Plan usage limits visible in UI

• Projects

Create, list & open projects
Project icons
Overview dashboard
Project members & roles
Visibility settings
Archive / restore / delete
Guided onboarding to first board

• Security & admin

Role-based access control (RBAC)
Audit logs for admins / owners
API keys (mtm_... prefix)
Webhooks with event subscriptions
Encryption in transit & at rest
Platform super-admin portal
Tenant, plan & coupon ops

• Integrations & settings

Full REST API for custom workflows
Profile photo crop & upload
⌘K command palette (pages + projects)
Light / dark theme toggle
"What's new" banner & feature tour
System status / health widget

• Mobile companion

iOS & Android (Flutter)
Boards, tasks, comments, attachments
Recurring planner (calendar + series)
Offline project cache
FCM push notifications
Geofenced subtask completion

RBAC

Audit logs

API keys

Webhooks

Complete feature catalog

Everything MiniTask ships today — for RFPs, sales decks, and security questionnaires.

● Account & access

Email/password, Google OAuth, phone OTP
Email verify, reset, change email
Invite-token signup · Super-admin login

● Structure

Multi-workspace · Org branding · Custom roles
Projects with icons, members, archive
Guided onboarding · Plan limit enforcement

● Boards

Kanban · Scrum swimlanes · Table view
WIP limits · Filters · Sort · Saved views
Bulk actions · Quick-add · Board RBAC

● Tasks

Rich text · Priorities · Due date/time
Multi-assignee · Labels · Story points
Hierarchy · CSV/ZIP import & export

● Subtasks & files

Status, assignees, dues, priorities
Attachments with preview
Mobile geofenced completion

● Recurring

Daily / weekly / monthly / custom
Complete · Skip · Snooze · Pause
Health panel · Overdue lane · Calendar

● Collaboration

Comments · @mentions · Activity feed
Notifications inbox · Email alerts
Mobile FCM push

● Automation & time

Rules: notify, status, log time
Time entries · Estimated vs logged
Custom fields · Saved views

● Analytics

Org & project dashboards
Activation funnel · Active users
Recurring health KPIs

● Billing

Free / Silver / Gold · Razorpay
Annual billing (~15% save)
Coupons · Usage widgets · Downgrade

● Integrations

REST API · API keys · Webhooks
Workspace CSV export
🔗K palette · Themes · What's new

● Mobile & ops

Flutter iOS / Android companion
Offline project cache
Super-admin tenants, plans, audit
